If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game – dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions – IMMEDIATELY discontinue use and consult your physician before resuming play.

## INTRODUCTION

They are like locusts, roaming the galaxy, attacking unsuspecting worlds, using up their resources and moving on.

Now they have come to Earth.

Just twenty-four hours ago, their fleet of giant City Destroyer spacecraft assumed strategic positions above all the world's major cities, threatening to annihilate millions unless the people of Earth can unite in time to repel the invasion. But the clock is ticking.

Fortunately, an important first step in combating the aliens has been achieved: a virus has been delivered to the Mother Ship's central computer, weakening the shield strength of the City Destroyers. Now it's up to you to finish the job.

As an ace fighter pilot, you and your wingman, Steve Hiller, must battle through the remaining alien defenses, finish off the shields and take out each city destroyer before time runs out. To accomplish your various mission objectives, you will have an arsenal of state-of-the-art weaponry at your disposal. Your most valuable weapons, however, will still be your wits, your courage, and your instincts.

Don't choke. The citizens of earth are counting on you.

## GETTING STARTED

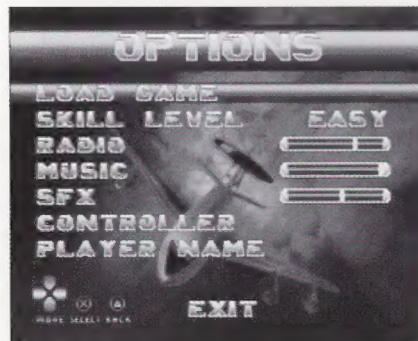

Insert the Independence Day disc into the PlayStation™ console and close the CD door. Insert controller(s) and turn on the PlayStation™ game console. ## MAIN OPTIONS MENU

Choosing OPTIONS from the Main Menu will bring up the following Main Options Menu. Make your selection using the UP and DOWN Directional Buttons.

**Load Game:** If you have saved a previous game using a Memory Card, you can use this option to restore it as explained in the LOAD/SAVE section of this manual.

**Skill Level:** Use the LEFT and RIGHT Directional Buttons to select the desired level of difficulty.

The window at the bottom of the screen explains your mission objective. Press the LEFT and RIGHT Directional Buttons for a description of your targets, along with descriptions of the various weaponry and aircraft (alien and friendly) which you will encounter during your mission.

Exit: Press ⊗ to return to the Main Menu.

## MISSIONS

Remember that each mission has an objective which must be carried out before your allotted time expires. Concentrate on the objects that appear white on your radar. The triangular radar pointer will always direct you toward your primary objective.

Grand Canyon Mission Objective:

On the underside of the City Destroyer are four field generators that provide a defensive shield around the ship and the city perimeter. Your mission is to destroy all four, then take out the primary weapon.

Washington Mission Objective:

Alien defenses are threatening to destroy the E-3 AWACS. Your mission is to

protect them until they can complete their reconnaissance of the City Destroyer, then take out the primary weapon.

New York Mission Objective:

A collection of Earth-based satellite uplinks are being used by the Aliens to communicate with other City Destroyers. Your mission is to locate and destroy these uplinks, then take out the primary weapon.

Other mission objectives will be given to you on a need to know basis, good luck!

## BONUS LEVELS/WARPGATES

On certain levels, you will have the option of entering a "Warpgate," a large funnel-like object suspended in mid-air just below the underside of the City Destroyer. If you decide to enter a Warpgate, you will be transported to one of three Bonus Levels at Cape Canaveral, the Nakhoda Sub Base or the Antarctic where you must destroy the remote shield generator before another Warpgate will appear to transport you back.

## LOADING/SAVING

If you are using a Memory Card, you can save game information and reload it at another time.

Each SAVE registers your status at the beginning of the given level, including such information as missiles remaining, bonus planes found, special weapons, high score and personal preferences.

**Saving to Memory Card:** At the beginning of each level you are given the option to START play or SAVE the game at that point. Use the UP and DOWN Directional Buttons to select SAVE, then press ⊗.

If no memory card is present, you will be given a password. Write it down exactly as this password can be entered to load a game as described below.

**Loading from Card:** Choosing OPTIONS from the MAIN MENU will bring up the MAIN OPTIONS MENU where you may load a previously saved game by selecting LOAD GAME and pressing ⊗. The game will then resume on the level that it was saved on.

If no memory card is present, you will be given the option to enter a password to restore a saved game. Use the RIGHT and LEFT Directional Buttons to find and select the desired letter; then press ⊗ to choose that letter. Choosing CLEAR will clear the password entirely. When done, choose END.

### Bonus Planes:

Your primary aircraft as you begin play is an F/A 18 Hornet armed with AIM-120 Amraam missiles. On more advanced levels, by finding the right Pickups, you can expand your aircraft selection to include a variety of bonus aircraft. Make your choices carefully according to their ratings of speed, agility, durability and stealth.

Each of these Pickups awards you the option to choose a different bonus plane on the next level.

These are "extra lives". When you crash or are shot down, you lose the current plane.
